

Levi Breeding is a Human Factors Research Specialist on the Cabin Safety Research Team (AAM-632) at the FAA's Civil Aerospace Medical Institute (CAMI). He holds a B.S. in Psychology: Crisis Counseling, M.A. in Industrial-Organizational (I-O) Psychology, and currently is an I-O Psychology doctoral candidate. Prior to joining the FAA, he held many roles in his 20 year career across four Part 121 air carriers. These roles include flight attendant, flight attendant manager, Cabin Systems and Interiors supervisor, Corporate Regulatory Compliance investigator, Internal Evaluation Program auditor, and Line Operations Safety Assessment manager. His current field of research involves exploring the efficacy and implementation of extended reality in flight attendant training and cabin safety research.
